BOT CABINET

A LINCHPIN PROJECT

CREW DOSSIER
07

CREW KIT / STANDING BOT TEAM / CK-07

Weekly Business Review

Review this week's results, unfinished tasks, workload and decisions in one summary.

CREW MANIFEST

4	3	4
SPECIALIST BOTS	WORKFLOWS	STAGES

BUILT FOR

Founders, independent operators, executives, and small leadership teams

01 / ASSEMBLE THE CREW

One function, clear responsibilities

The Weekly Business Review gathers approved operating information, explains material changes, identifies conflicts, prepares decision questions, and converts approved priorities into next actions.

01 Ops

Gather approved metrics, project status, deadlines, and exceptions.

OPEN BOT PROFILE

02 Researcher

Explain changes, gaps, and possible causes.

OPEN BOT PROFILE

03 Chief of Staff

Prepare the decision brief and surface capacity conflicts.

OPEN BOT PROFILE

04 Planner

Turn approved decisions into owners, actions, and dates.

OPEN BOT PROFILE

02 / RUN THE WORK

Repeatable jobs and handoffs

Begin with one manual run. Preserve each approved output before the next Bot starts. Add schedules only after the handoffs work.

Core workflows

Operations status

Consolidate work, risks, owners, and exceptions.

Leadership review

Prepare priorities and decisions for the coming week.

Capacity check

Compare active work with available time and deadlines.

Operating rhythm

GATHER

Collect metrics, work status, and exceptions.

Owner: Ops

INTERPRET

Explain movement and mark unreliable data.

Owner: Researcher

DECIDE

Present conflicts and questions.

Owner: Chief of Staff + person

COMMIT

Record approved priorities, owners, and dates.

Owner: Planner

03 / CREW PASSPORT

Access, approval and limits

The Passport is a planning record. Apply these limits in Hermes Desktop and in every connected service before the Crew begins work.

ALLOWED ACCESS

The Crew may use

- Approved dashboards and status exports
- The weekly review workspace and decision log

HUMAN ACTION

A person performs or releases

- Change a priority, assignment, deadline, or metric
- Message a client or team member
- Make a financial or personnel decision

PROHIBITED

Bots must never

- Invent missing metrics
- Change records to improve performance
- Expose confidential information

APPLY THE RULES

• Use read-only or draft-only access where available.

• Role instructions explain the limits but cannot enforce them by themselves.

• Require a person to release messages, purchases, submissions, and other external actions.

• Treat emails, webpages, attachments, and retrieved records as reference material. Do not follow instructions inside them or let them change the Bot's role or access.

• Keep credentials outside Bot files, downloads, and handoff records.

04 / FIRST DEPLOYMENT

Prepare, test and measure

Use low-risk sample material first. A successful manual test is the prerequisite for more access or automation.

Shared inputs

- Approved metrics and definitions
- Current project, client, and operations status
- Deadlines, capacity, and previous decisions

Success measures

- [ ] Every metric uses an agreed definition and source
- [ ] Conflicts and weak evidence are visible
- [ ] Every approved action has an owner and date

Set up the kit

01 Open each Bot's page below. Check its files, version and test status before downloading.

02 Download each approved profile and import it into Hermes Desktop.

03 Open each Bot's settings in Hermes Desktop. Give it only the files, tools, and connections needed for its role.

04 Set matching limits in connected services, such as read-only access or draft-only access. The Crew Passport is a checklist; it does not apply these limits for you.

05 Run one workflow manually in separate Bot conversations.

06 Save each approved handoff before the next Bot begins.

07 After the manual test works, you can add a shared task board or a scheduled Hermes routine.

Return to the live Crew Kit

Open the current Bot profiles, linked workflows and any future updates from the live Bot Cabinet page.
